

13th WORLD CONGRESS OF THE RSAI

Smart Regions - Opportunities for Sustainable Development in the Digital Era

Virtual Conference
MAY 25-28
2021

RSAI
THE REGIONAL SCIENCE ASSOCIATION INTERNATIONAL

Special Session (SS45) on: Selected regional science topics in Mexico

Organizer:

Serena Eréndira Serrano Oswald, Regional Multidisciplinary Research Centre (CRIM), National Autonomous University of Mexico (UNAM). Email: sesohi@gmail.com

Purpose and scope:

Regional Science research in Mexico dates back to at least six decades. The Mexican Regional Science Association (AMECIDER) was established in 1993, generating a space for multidisciplinary regional science research. This session aims to present selected research topics and methodologies that are relevant in today's regional science debates in Mexico and nurture regional science in the context of AMECIDER. Complementary aims include fostering exchanges with other regional science sections and peers, as well as providing a specific space in the World Congress to discuss Mexico.
