The aim of the workshop is to bring together scientists and practitioners in the field of input-output research and to provide a platform for sharing experiences and research methods in the area of input-output analysis.

Topics to be discussed during the workshop could encompass the production of (inter)national and regional input-output tables, the development of input-output models or applications of input-output analysis to specific fields of interest.

We welcome contributions in the following exemplary research fields:

- Database creation
- Structural analysis
- Scenario analysis
- Evaluation

Further topics and proposals for special sessions are highly welcome.
