Peter's research has been in the area of economic development policy, focusing on physical and human infrastructure. Projects have included rural telecommunication policy, science and technology policy affecting rural-urban economic clusters, economic development, regional and international trade, comparative economics, policy toward investment in higher education research and teaching activities (such as land-grant institutions), and general infrastructure issues.

Prior to joining ERS, Peter was an assistant professor in the Economics Department at Hamline University, a research associate in the Center of Urban and Regional Affairs (Humphrey Institute), and a private consultant who had research contracts with various State and Federal agencies, universities, and corporations across the country.

Peter earned a Ph.D. and an MS in Applied Economics from the University of Minnesota. He also holds a BS in Engineering from the University of Minnesota.
