Dr Emmanouil Tranos is an economic geographer focusing primarily on digital geographies. He has published on issues related with the spatiality of the Internet infrastructure, the economic impacts that this infrastructure can generate on space and the position of cities within spatial, complex networks. His research in this area led to a monograph on “The Geography of the Internet: cities, regions and Internet infrastructure”. Recently, he has been focusing on the use of big data of high spatio-temporal resolution (e.g. mobile phone data) in urban and regional analysis. Regarding research methods, his work combines econometric methods and spatial analysis with tools and concepts from network theory.
