

NEW METROPOLITAN PERSPECTIVES 2020

SPECIAL EVENT

INTERNATIONAL DESIGN WORKSHOP/COMPETITION Rhegion United Nations 2020-2030

TERRITORIES AND CITIES, MATERIAL AND IMMATERIAL HERITAGE, RESILIENCE AND TRANSFORMATIONS

IN THE PERSPECTIVE OF THE 17 SUSTAINABLE DEVELOPMENT UN GOALS
1-5 June 2020 REGGIO CALABRIA

Starting from the 17 objectives of the UN Charter of 2015, the International Design Workshop involves the various disciplines actors in the formation of both ancient and modern space. Synergy is the key word, from the Greek *συνεργία*; that is cooperation, integration, for solutions in a holistic space perspective. Building a sustainable polis, with roots in history and sustainable for the future, where the *Comunitas* live with good quality of life, in accordance with nature, as required in the Encyclical *Laudato Be on the Care of the Common House* focused on integrated ecology. It is a tentative to construct/implement the necessary cultural and operational change to pursue sustainable development through cultured technology, of which it speaks of the North since 1991. The Workshop is an opportunity to test design practice and theories of recovery and redevelopment in the light of the UN 2020 - 2030 objectives in the context of the Reggio Calabria Metropolitan Area, rich in naturalistic features and ancient testimonies, with significant tourism potential. And rethinking the identity of these places characterized by a widespread absence of modernity but immersed in the most vast global mutations.
