

***Special Session (SS34) on:
Disaster Management – A Frontier in Regional Science***

Organizer:

Manas Chatterji - State University of New York at Binghamton, Binghamton, US; Peking University, Beijing, China. E-mail: mchatter@binghamton.edu

The aim and scope:

The objective of this session will be to present contributions related to the theoretical and applied approaches to Disaster Management in regional framework and indicate how they can be improved. These papers will deal with both natural disasters like earthquake, flood, tornado etc. man-made disasters like terrorism, like 9/11 and environmental disaster like in Bhopal etc. Some of the papers in the sessions will make a historical review of such disasters in different parts of the world and relate it in a geographical setting of risk and vulnerability. Then presenters shall discuss the status of existing models of prediction using modern technology and their reliability.
