

***Special Session (SS35) on:
Regional Science: Its Past and Future Frontiers***

Organizer:

Manas Chatterji - State University of New York at Binghamton, Binghamton, US; Peking University, Beijing, China. E-mail: mchatter@binghamton.edu

The aim and scope:

Regional Science has a spectacular history as a new social science discipline during the last fifty years. Walter Isard University of Pennsylvania was its founder. I had the privilege as his student and colleague for forty years. He was my mentor. We established Regional Science Association (International) many years ago. It now has branches in more than fifty countries. Indian section which I co-organized with Professor Pathak is more than fifty years old. I also co-established the Chinese section. Contributors of papers in this session will discuss the development of regional science in the past and its future horizons like usage of Big Data, Data Mining, Artificial Intelligence and other emerging techniques.
